

# A FORCE FOR GOOD

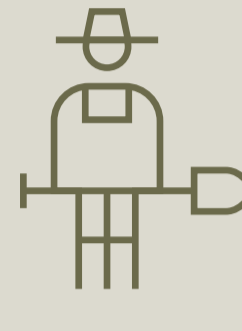

**At Nespresso® Professional, we're committed to creating a positive impact and helping to build a sustainable future.**

By helping shape communities and preserve landscapes through the cultivation of our coffee, we ensure that a Nespresso® cup of coffee isn't just about great taste, but also makes a difference.

## OUR COMMITMENTS

### CIRCULARITY

At Nespresso®, we're constantly innovating to be more efficient with our resources and reduce our environmental impact, and we do this through:

**Sustainable coffee cultivation** that increases biodiversity, enriches soils, conserves local water supplies and enhances interaction with the environment.<sup>1</sup>

**Responsible management** of resources, both in sourcing virgin aluminium and in looking to use recycled materials to minimise energy consumption.<sup>1</sup>

**Efficient and renewable energy use** with 100% of electricity supplied to our production centres coming from certified renewable sources.<sup>1</sup>

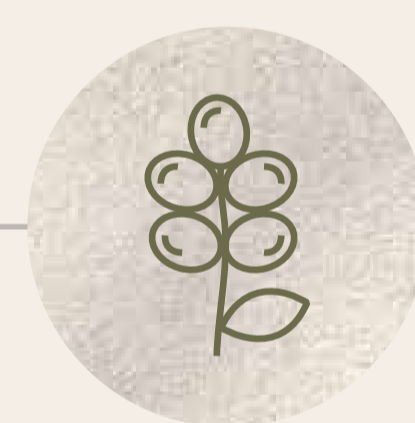

**Offering dedicated services** for both businesses and consumers to try to make recycling as easy as possible.<sup>1</sup>

### SUPPORTING FARMER'S LIVELIHOODS

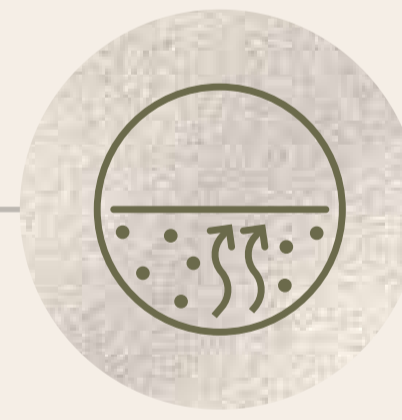

Nearly 20 years ago, we partnered with the Rainforest Alliance to develop an innovative and sustainable approach to coffee sourcing.

Through Nespresso®'s AAA Sustainable Quality™ Program, we are able to offer high quality coffee while creating stable livelihoods for farmers and their communities and protecting the environment. This is achieved by:

**EMPOWERING FARMERS** with training to help them achieve more sustainable agricultural practices.<sup>2</sup>

**ACTING AS A CATALYST** to help build resilient solutions for landscapes in the face of risks like climate change.<sup>2</sup>

**BRINGING TOGETHER RESOURCES** from farmer organisations, academics, municipalities and governments to address wider sector challenges such as market unpredictability.<sup>2</sup>

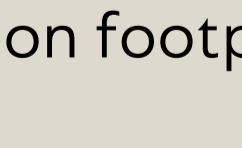

### CARBON NEUTRALITY

When it comes to your coffee's carbon footprint, it's what you don't see that makes the difference. We have looked across the entire lifecycle of a single cup of coffee in order to reduce its carbon footprint and to reach our goal of creating a carbon neutral cup of coffee.

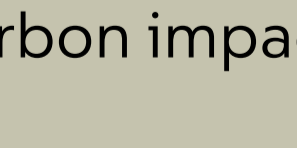

#### HOW COFFEE IS CULTIVATED

We promote sustainable practices and use a precise amount of coffee in our capsules which are key to improving our carbon footprint.<sup>3</sup>

#### HOW THE COFFEE IS PACKAGED

To protect the unique aromas and flavours of our coffees, we use aluminium, which is infinitely recyclable to further reduce the carbon impact.<sup>3</sup>

#### HOW A CUP OF COFFEE IS PREPARED

Our precision brewing system optimises the amount of coffee, energy and water used to prepare a cup of coffee.<sup>3</sup>

With Nespresso® Professional, you can rest assured that every coffee is made with care. To discover how our full range of coffee solutions can be tailored to your unique business requirements, simply call us on
